

Atlas is a next-generation knowledge platform purpose-built for Microsoft 365. It simplifies how teams contribute and find knowledge -automatically enriching, organizing, and delivering knowledge with precision, context, and control.

Atlas bridges the critical gap between unstructured content and AI accuracy. It ensures your knowledge is consistently tagged, governed, and discoverable so Gen AI tools return answers you can trust.

Think of Atlas as your intelligent knowledge assistant, seamlessly connecting people to the right content, expertise, and insights, securely and in context.

Atlas solves critical business challenges

Knowledge Challenges

-  Employees can't find what they need quickly
-  Breaking down data and people silos
-  No authoritative source of truth

AI Challenges

-  Poor data quality and lack of trusted, authoritative information
-  Rapidly escalating costs and risks due to scaling AI
-  AI tools don't deliver business value nor safeguard client data
