

Intelligent Knowledge Platform for professional services

Atlas is a next-generation intelligent knowledge platform that reimagines how professional services firms manage and use knowledge - capturing it effortlessly, enriching it with context, and unifying it across Microsoft 365.

Whether managing client knowledge, internal operations, or thought leadership, Atlas consolidates content, collaboration, and expertise into one governed platform, seamlessly embedded in the tools your teams already use.

There is no other platform like Atlas. It ensures that knowledge is always secure, accurate, and contextual and instantly connects teams to what they need to deliver with clarity and confidence.

What Atlas does for you

- Captures knowledge seamlessly, at scale across the firm.
- Provides accurate and authoritative answers to easily share with colleagues and clients.
- Atlas delivers scalable, AI-powered solutions for enterprise-wide knowledge and productivity use cases.
- As an all-in-one platform, Atlas creates a single source of truth and enhances collaboration across your firm.

"We have been hugely impressed with what we have been able to deliver to our tax users through the implementation of the technology – and we are confident that all the big goals we have set will be achieved."

Stuart Tait

Partner and Chief Technology Officer at KPMG UK

Featured customers::

All-in-one platform

Knowledge Management

Atlas captures, centralizes and auto-tags content across Microsoft 365, empowering employees to access and share collective knowledge and locate experts.

Knowledge Intranet

Brings together people, processes, and tools in a single platform to foster collaboration and knowledge sharing.

Extranet for Client Portals

Powerful client self-service capabilities that transform how you deliver services and collaborate with clients.

Enterprise AI

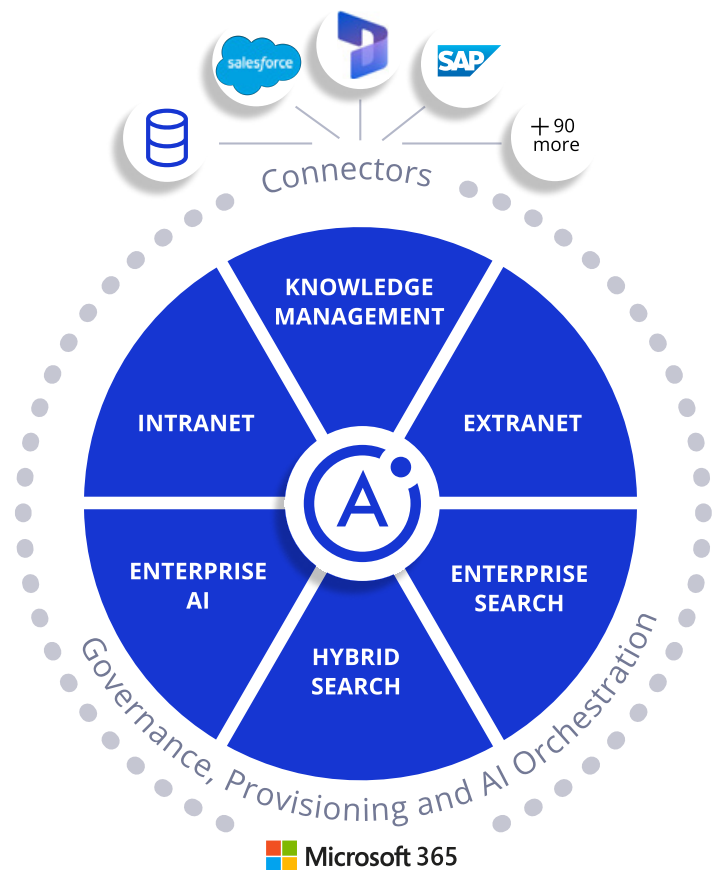

Leverage knowledge from Microsoft 365, your DMS, or CRM to surface accurate insights that showcase your firm's expertise.

Governance and AI Orchestration

Create and manage Microsoft 365 workspaces and AI with built-in controls and audit trails for secure, compliant use.

Enterprise and Hybrid Search

Atlas breaks down M365 silos and extends search across platforms like SAP, Salesforce, and Dynamics. With AI, machine learning, and automation, it delivers unmatched search precision.

Why Atlas?

- ✓ **Gold standard for knowledge**
Atlas simplifies enterprise knowledge with automated capture, classification, and effortless information retrieval.
- ✓ **Find information instantly**
Effortlessly find the right information with Atlas' Enterprise Search, AI Assistant and Hybrid Search.
- ✓ **Expert-like answers from AI**
Atlas is designed to generate precise and trusted AI answers, informed by verified and high-quality data.

- ✓ **Embedded in Microsoft 365**
Atlas leverages the tools your teams already use, enabling firms to maximize their existing investments while boosting productivity.
- ✓ **Self serve securely**
Atlas enables employees to self-serve, with unmatched governance and provisioning capabilities.
- ✓ **Scalable AI for diverse needs**
Atlas harnesses advanced AI orchestration to connect knowledge, people and platforms, driving value across the enterprise.
